## Article Information

- Article Title:** The title of the research article.
- Journal title, volume, issue, publication year, and article number (or pagination)**
- Abstract:** A concise summary that highlights the study's objectives, methods, key findings, and conclusions.
- Keywords:** Specific terms or phrases that capture the main topics of the study. It is a good idea to enrich author-provided keywords with terms from relevant controlled vocabularies.
- Persistent Identifier (DOI, ARK, Handle, URN):** DOI should always be displayed as a full URL link in the form <https://doi.org/10.xxxx/xxxxx>. Learn more: <https://www.crossref.org/display-guidelines/>
- Publication timeline :** Dates of article submission, review, acceptance and publication.
- Funding information:** A statement disclosing financial support received for the research or project. This section typically includes details about grants, sponsorships, institutional support, or other financial resources that contributed to the study. It often specifies the funding organisations or agencies (using funders' persistent identifiers, e.g. RORs, is recommended), grant numbers, and any relevant funding acknowledgements.

## Author information

1. **Full names of authors:** See Author contributions for more details

 2. **ORCID (Open Researcher and Contributor ID):** Unique identifiers for each author.

3. **Institutional affiliations:** Authors' institutions, including full names and addresses, e.g. University, Faculty/Institute, City, Country

 4. **ROR (Research Organization Registry ID):** Institutional persistent identifier

5. **Author Contributions:** Contributions for deserving authorship include not only writing but also the activities related to the conceptualisation and execution of the research, collection and production of the research data/materials, analysis and interpretation. Use the Contributor Role Taxonomy (CRediT) to describe the key types of contributions made to the article. See Contributor Role Taxonomy (CRediT) below for more information.

## Journal and publisher information

- Journal title :** it should be the same as registered in the ISSN International Registry. Don't use any unofficial translated or abbreviated forms.
- Publisher's name.** Display the publisher's name prominently on the journal website. Use the official name, as registered in the ISSN International Registry.
- ISSN and eISSN.** ISSN (International Standard Serial Number) and eISSN (electronic ISSN) are unique identifiers assigned to print and electronic versions of a serial publication, respectively. Display these numbers prominently on a journal website to make it easy for users to locate and verify this information.

## Referencing

- 1. References.** A list of sources cited throughout the text that provide supporting information, prior research, or context for the study, acknowledging the work of other researchers and enabling readers to locate original sources for further study. Use standardised citation styles (e.g., APA, MLA, Chicago) to ensure consistency and facilitate accurate identification of sources. When deciding which citation style to use in your journal(s), you should give preference to those that include DOI or URL in reference list entries (e.g. APA, Chicago) and always display DOIs and URLs as links.
- 2. Supporting information:** Providing links to related research outputs (e.g. research data deposited in repositories, preprints, and registered studies, etc.) in the metadata of a journal article enhances the transparency, reproducibility, and discoverability of research. Use persistent identifiers to establish links with the related content.
- 3. How to cite.**
